	Cut off for national certificate	24.0			
	Cutoffs will be counted against normalised scores.				
	(Normalisation factor for Leg 2 scores)	1.5			

* So if you wrote exam in Leg 2 (28th September) then your score will be multiplied by 1.5. E.g. if you scored 20, it will be counted as $20 \times 1.5 = 30$.

* Note that this scaling up will not affect students qualifying for RMO or getting regional certificates (except for KVs and JNVs) since those are applicable only region-wise, and except for KVs and JNVs all students from a region wrote only one leg of the exam.

* For KVs and JNVs and for National Certificates an analysis of the count shows that the number of selected candidates is within the range expected for the regions.
